Subject: Oil Sample Analysis
Date: Tuesday, September 06, 2016 6:52:52 AM

Good morning,

I have the data I need to prepare the report for the samples received 30Aug16 and will be working on that today. Unfortunately, there was a software error over the weekend during the mass spec sequence for the samples received 23Aug16 so I still cannot prepare that report.

Before I prep new aliquots for analysis, please advise as to how you would like me to proceed. Would you like me to run the samples from 23Aug as 10 samples, running one representative from each batch of replicates? Or would you like each vial treated as an individual sample for a total of 27 samples?

Running as 10 samples, I will have the report done tomorrow. Running as 27 samples, I will have the report ready Thursday. No preference on this end; I just wanted your input before proceeding.

Best regards,
Kristy
